Pitching Strategies

Starters: As usual, never remove a starter pitching a shutout and never let a starter pitch more than 11.7 innings. If the starter gets pounded, he needs to pitch 4 innings then spread the pain around the bullpen. Otherwise, here are the general guidelines:

Dickey, Sabathia: They should reach fatigue limit in every start, even if you tag him with a 5 point downgrade early in the game. However, if In a tight game, (+2 to -2) remove when reduced and/or fatigued, If the Stars are ahead by 4 or more, they can pitch through one fatigue reduction.

Kuroda, Gonzalez, Iwakuma: Like to see them reach their fatigue limits, but if downgraded before then and the game is within reach (down 3 or less), then go to the pen. When down by 4 or more, keep them in game for 6 innings. If we score runs and get within three then remove them.

Lariano, Billingsley: If they make it to the 6th without being downgraded and the game is +/- 3, go to the pen. If the margin is more than three either way, they stay on the mound until that first runner reaches base, than go to the pen.

Relievers: Burton is the closer with plenty of innings and can come in during the 8th if needed. Soriano, Lincoln, and Miller should be used in close games in the 7th and 8th. Use all others as you see fit. It'll be important to take advantage of the +5 vs first batter faced. Russell, Duensing and Lindstrom make up the rest of the pen and are always available. Aceves is long reliever and late inning mop up (+6 to -4).

Defensive Strategies

Holding runners on 1st: Never hold if score is +4/-4. Otherwise, always hold with two out or with PL at bat. If less than two out and SA or PR at bat, hold if base SSN is greater than 18 and the runner has steal attempts remaining. Throw at all base stealing attempts.

Play infield in: Play in with a runner on 3b in the 7th inning or later if the Stars are behind by two or less, tied, or up one (+1 to -2).Outfield Throws: Always throw for go-ahead run. Board Game -Throw for lead runner with less than 34/36 chances, otherwise throw to hold trailing runners. Computer game- always throw for slow lead runner, throw for average and fast lead runners unless "well around", otherwise throw to hold trailing runners.

Defensive replacements: Not much flexibility. If we lead after we hit in the 7th, put Gwynn in OF replacing OF-1.

Lineups : These are representative lineups. Monthly lineups will normally be provided by the 1st of the month

Offensive Strategies (in order of preference)

Steal: Pennington, Furcal and Gwynn can steal second from the 8th inning on if they represent the tying/lead run.

Hit and Run: H&R if +1/-2 run differential, any inning, with Pennington running, less than 2 outs, with hitters who are designated in the lineups above. Do not hit and run if your pitcher's control is worse than -26 on the board game or has a W on the computer.

Sacrifice: 8th or 9th place hitter at bat, 7th inning or later, tied or behind by one run, no outs, runners on first, or first and second. Remove after two strikes on batter. Don't squeeze.

Runner Advancement: Board Game- check Adams Tables. Computer Game- always try for the extra base when "well around".

Pinch hitting: Unless specified in the monthly updates, let everyone play through their shifts. If tied or behind by 1 or 2 runs and a LH pitcher is brought in to face Chavez, pinch hit Guzman. Then either Lopez or Furcal to 3b.

Pinch running: Gwynn for any Slow Runner in ninth if they are the tying or winning run.
