Italics = innocuous (Batista as a starter; Chamberlain as a reliever)

Average Team Age = 27.8 (hitters = 27.8 / pitchers = 27.8)

Cuts: Fernando Abad, Sammy Freeman, Justin Germano, Matt Hague, Livan Hernandez, Alex Hinshaw, Scott Maine, Vin Mazzaro, Evan Meek (unc.), Luke Putkonen, Chris Rusin, Jonathan Sanchez, and Josh Tomlin. **Waivers:** Wait for it...

Do not use BBW managers. I play the Board Game at home. With dice. Please send BOTH teams' stats and game sheets.

MOOD STATEMENT

The team isn't all the way back from the brink of despair, but it's moving in the right direction. The offense should be solid for years, with a few players who still haven't had their best seasons, and the pitching should rebound from the horrid mess it is now. In the meantime, we'll score (and give up) runs in bunches, and there's not much to stop either from happening. Do your best with the pitching staff, given its limitations, and roll us some good dice.

BATTING ORDERS

The following batting orders are for true emergencies only. I SEND OUT LINEUPS WITH THE INSTRUCTIONS FOR EVERY ROAD SERIES. If you don't receive them (or a message from me) by the 4th of the month, contact me. I might be drowning my sorrows in the Land of Forgotten Pitchers (of Beer)...

Lineup vs. RHPs

DeJesus (CF-3)
 Cespedes (RF-2)
 Butler (DH)
 Encarnacion (1B-3)
 Holliday (LF-1)
 Seager (3B-3)
 N.Walker (2B-8)
 Avila (C-8)
 B.Crawford (SS-8)

Lineup vs. LHPs

Forsythe (SS-7)
 Cespedes (RF-2)
 Butler (DH)
 Encarnacion (1B-3)
 Holliday (LF-1)
 Seager (3B-3)
 Stubbs (CF-3)
 N.Walker (2B-8)
 Bo.Wilson (C-7)

Lineup vs. Computer

Cespedes (RF-2)
 N.Walker (2B-8)
 Butler (DH)
 Encarnacion (1B-3)
 Holliday (LF-1)
 Seager (3B-3)
 DeJesus (CF-3)
 Avila (C-8)
 B.Crawford (SS-8)

2013 GRAND CAYMAN HAVENS

Emergency Instructions

OFFENSIVE STRATEGY

Hit and Run

HIT AND RUN EARLY AND STEAL LATE. H&R with:

- **BATTERS:** Bonifacio, Butler, Cespedes, DeJesus, Forsythe, Seager, and N.Walker.
- **BASERUNNERS:** Bay, Bonifacio, Cespedes, DeJesus, Encarnacion, Forsythe, Holliday, Seager, Stubbs, and N.Walker.

Board Game: With runners at 1B and 3B, H&R only with 0 or 2 out.

Computer Game: Never H&R with 2 outs. Check for SB instead.

Pinch-Running

See the usage chart. In the 7th or later, PR with a SB threat if we're tied or down 1–2 runs. **Stubbs** is the main guy; also **Bay**, **Bonifacio**, and **Forsythe**. Note that **Marquis** and **E.Rogers** have 15 speed, **Buchholz** has 12 speed, and **Batista** has 11 speed, for runners in scoring position.

Player-by-Player Usage Chart

Player	Role(s)	When to Take Out of the Game	Use off the Bench	Notes
Ma.Adams	PH in November	After he strikes out in his time at bat.	To PH vs. RHP.	He's likely active only in November.
Avila	C vs. RHPs	RARE. PR in the 8 th or later if he's the tying or go-ahead run. PH vs. LHP, same situation.	RARE. Only for Bo.Wilson .	He plays through his shift unless we can go ahead, 8 th inning or later.
Bay	OF/PR in Nov.	Any time he has to bat, unless we lead by 4+.	To PR; for defense.	He's likely active only in November.
Bonifacio	Part-timer/PH/PR	PH vs. LHP in the 7 th or later if we trail.	To PR; PH vs. RHP.	Use ONLY if we trail by 0–2 runs.
Butler	DH most games	RARE. PR in the 8 th or later if he's go-ahead run.	DO NOT USE.	He has 3 decent SB attempts too...
Cespedes	RF most games	NEVER.	DO NOT USE.	He can hit, run, and field. Our SNT!
B.Crawford	SS vs. RHPs	PH in the 7 th or later if we trail; PR for a SB.	To PR; for defense.	Put him at SS if we lead, 8 th or later.
DeJesus	CF vs. RHPs	PH vs. LHP in the 7 th or later ONLY if we trail.	To PH vs. RHP.	If we lead, he stays in the game.
Encarnacion	1B most games	NEVER.	DO NOT USE.	There's no reason to take him out.
Forsythe	SS vs. LHPs/UT	PH vs. RHP in the 7 th or later; for defense.	To PR; PH vs. LHP.	Defensive sub for Seager if we lead.
Holliday	LF most games	PR in the 8 th or later; for defense.	DO NOT USE.	Stubbs replaces him if we lead.
Seager	3B most games	PH vs. LHP in the 7 th or later; for defense.	To PR; PH vs. RHP.	He starts almost every game.
Stubbs	Spare OF/PH/PR	PH vs. RHP in the 7 th or later if we trail.	To PR; PH vs. LHP; for defense.	He's the "go-to" guy if we need a SB. Sub for Holliday if we lead.
N.Walker	2B most games	PH vs. LHP in the 8 th or later ONLY if we trail.	DO NOT USE.	He plays through his board shift.
Bo.Wilson	C vs. LHPs	PH vs. RHP; PR in the 8 th or later if we trail.	Only for Avila .	If we lead, he stays in the game.

DEFENSIVE STRATEGY

Outfield Throws

Always throw for the tying/go-ahead run in the 7th or later. Otherwise, throw unless chances are 33+. **Computer Game:** Follow this principle.

Hold Runner on First

Always hold if the score is within +/-4 runs, **UNLESS** the runner is absolutely no threat to steal. **EXCEPTION:** Do not hold vs. a PR hitter.

Play Infield In

PLAY IN in the 7th or later, 0–1 out, tying/go-ahead run on 3B.

Intentional Walk

Barry's seen it work. Use it sparingly, but do it if it makes sense to you.

Pitch From the Stretch

In the 7th or later, score tied or we're up 1, with a threat on 3B.

Injury Subs Position Defensive Subs

Bo.Wilson, Avila	C	none
Ma.Adams, Bo.Wilson, Encarnacion	1B	none
Forsythe, Bonifacio, N.Walker	2B	none
B.Crawford, Forsythe, Bonifacio	SS	B.Crawford
Seager, Forsythe, Encarnacion	3B	Forsythe
Holliday, Bonifacio, Stubbs, Bay	LF	Stubbs
Bonifacio, DeJesus, Stubbs	CF	Stubbs, DeJesus
Bonifacio, Stubbs, Cespedes, Bay	RF	Bay, Stubbs
Ma.Adams, Butler, Bonifacio, Forsythe	DH	

Stealing

- In the 4th or later, 0–1 out, score +/-2 runs: **Bonifacio**, **Cespedes**, and **Stubbs** have the green light to steal 2B with 27+ chances.
- In the 7th or later, score +/-1 run, add **Avila**, **Bay**, **Butler**, **Encarnacion**, **Forsythe**, and **Seager**. Steal 2B with 27+ chances.
- **LIMIT** all but **Bonifacio** and **Stubbs** to 1 straight steal attempt per series (but continue to H&R whenever the instructions allow).

Pinch-Hitting

See the usage chart. **Bonifacio** and **Forsythe** are often your best bets; **DeJesus** and **Stubbs** next. Do not use anyone marked "DO NOT USE."

Sacrifice

NEVER. Barry does not believe in it.

Runner Advancement

Use the Adams Tables. **Computer Game:** Play like it's your own team.

PITCHING STRATEGY

Managing the Starters

If our offense is clicking, we have a chance. Have confidence in our starters — let them fatigue — and then bring in the relievers in waves.

We have three rules this year:

1. EVERY STARTER (except **Batista** and **Marquis**) PITCHES UNTIL FATIGUED OR REDUCED.
2. DO NOT REMOVE A STARTER THROWING A SHUTOUT.
3. NO STARTER SHOULD EXCEED 11.7 INNINGS IN ANY GAME.

Rookies **M.Rogers** (8) and **Smyly** (6) have double-digit grades, but short fatigue ratings. If the game's within 2 runs when they fatigue, go to the bullpen. Otherwise, let them stay in until they fatigue again.

Buchholz (2), **Eovaldi** (3), **Hanson** (1), **Pomeranz** (4), and **Rosenberg** (9) have only one positive peripheral among them, but we need innings. If we lead, it's tied, or we're down by 3 or less when they fatigue, go to the pen. Otherwise, they stay in until it's JOBA TIME or until we close the gap.

Marquis (5) gets to make all of his starts, but he has a helpmate. As soon as he gives up 4 runs or a 5th inning baserunner, put in **E.Rogers**, who can go longer than 2.7 innings, as needed. In later innings, if the game is close, go to the better grades; otherwise, it's JOBA TIME: all beer is half price!

Batista (7) is our weight to bear. We had no idea he would be so valuable to us when we selected him in the 8th round of the draft, but he gives us 10 innocuous starts AND 30-plus relief innings in one roster spot. He must go at least 5 innings, but we're hoping for 6. Make him work. Hard.

2013 GRAND CAYMAN HAVENS

Emergency Instructions

Using the Bullpen

We have more non-innocuous relief innings than last year; however, this is still not a deep bullpen. We have **431.3** total relief innings (or about **2.7 innings per game**) and **371.0** NON-INNOCUOUS innings (almost **2.3 per game**). Unfortunately, these innings are scattered in 10 relievers. Review these notes and the chart below for usage guidelines. Good luck.

W.Lopez (A), RHP: He's our closer. With **66.3** innings, he can come in if we're tied or up 1-3 runs to stop a rally in the 8th, 9th, or later for the save or win. If he coughs up a lead, yank him. Limit: 1.7 innings per game.

L.Perez (B), LHP: With only **42.0** innings for the whole year, he comes in ONLY if it's tied or we lead and ONLY for short bursts in the 7-8th innings. Pretend he has an *f/3** fatigue. Limit: 0.7 inning per game.

M.Lowe and Pryor (B), RHPs: These two setup guys have **62.3** innings combined. THINK OF THEM AS ONE RELIEVER with enough innings to set up, which is their role despite all the negative peripherals. Only one of them will be active at a time. Their job is to hold the lead when we're ahead in the 7-8th innings only. Limit: 1.7 innings per game.

Batista, Carpenter, and Rosenberg (C), RHPs: These three middle relievers have **92.3** wild innings between the them to keep the game close if we trail by a few runs, mostly in the 5-7th innings. Two will be active most months. God help us. Limit: 1.3 innings per game.

T.Robertson (C), LHP: This middle reliever has only **25.0** innings, which he'll get to use over three months or so. Handle him as a LOOGY: lefty-one-out-guy. His job is to get the big lefty shift out or out of the game in the middle innings, from the 5-7th inning. Limit: 0.7 inning per game.

E.Rogers (C/D), RHP: With **78.7** innings, he's the guy we count on to eat up innings if we're down 4+ runs or the starter gets knocked out early. He is **Marquis'** helpmate. He can be used for 1-2 batters around the 7th to take advantage of big RH shifts (because of his peripherals), or he can go for longer than 2.7 innings to save other pitchers. No limits.

Chamberlain (D), RHP: Welcome back, Joba! If the game is out of reach, he has **60.3** innocuous innings to spread around during the course of the season. If he's in, it's JOBA TIME! Everybody drink! No limits.

USE THE CHART BELOW AS A **QUICK REFERENCE GUIDE** TO DETERMINE WHICH RELIEVER TO BRING IN WHEN. The section above has limits and usage notes. Besides **E.Rogers**, the roles are very well defined this year. If we need a reliever for **innings 1-6**, it means the starter's been pounded out, so that means it's probably JOBA TIME! Except for **E.Rogers**, don't abuse the other relievers. Spread the work around. Thanks and good luck.

RELIEVER CHART	Down 4+	Down 3	Down 2	Down 1	Tied	Up 1	Up 2	Up 3	Up 4+
6th inning	D	D	C	C	C	C	C	C	C
7th inning	D	C	C	C	B	B	B	B	B
8th inning	D	D	C	C	B to A	A	A	A	B
9th inning	-	-	-	-	A	A	A	A	B
