Offensive Strategies (in order of preference)

Steal: **Andrus**, **Kipnis**, and **Zobrist** are the main threats. They have the green light to attempt steals of second from the 3rd inning on in games that are within 2 runs either way. If your catcher has a negative arm, they can attempt steals of third as the tying/lead run with 1 out 8th inning or later.

Hit and Run: Not a lot of H&R potential on this year's team. We'll be looking to H&R with our lineup as designated in the lineups above. Do not hit and run if your pitcher's control is worse than -26 on the board game or has a W on the computer.

Sacrifice: Don't

Runner Advancement: Board Game- check Adams Tables. Computer Game- try for the extra base when "well around", otherwise hold.

Pinch hitting/pinch running: **Konerko** will generally be available to pinch hit vs a LHRP. However, don't bring him in if you'll counter with a RHRP. **Rosales** is available to pinch run for a slow runner representing the tying/go-ahead run in the 8th or later. Get the best defense afterward.

Pitching Strategies

Starters: As usual, never remove a starter pitching a shutout and never let a starter pitch more than 11.7 innings. If the starter gets pounded out, spread the pain around. Otherwise, here are the general guidelines:

Leake, Wandy, Fister, Arroyo, and Porcello: The bullpen is a little thin, so we'd like to see them reach their fatigue limits. If downgraded before then and the game is within reach (down 3 or less), then look to the pen. If down by 4 or more, keep them in the game and if it gets within three then get the bullpen warmed up.

Slowey and McCarthy: If they make it to the 6th without being downgraded and the game is +/- 3, go to the pen. If the margin is more than three either way, they stay on the mound. If it tightens up later on, go to the pen.

Relievers: **Robertson** is the closer and should start the 9th in save situations. He'll be set-up by **O'Day and Choate** in the 8th. Middle relief will be handled by a variety of relievers in any given month. Use them as you see fit. There are not a lot of high grades in the pen, so it'll be important to take advantage of the +5 on the boards.

Defensive Strategies

Holding runners on 1st: Never hold if score is +5/-5. Otherwise, always hold with two out or with PL at bat. If less than two out and SA or PR at bat, hold if base SSN is greater than 20 and the runner has steal attempts remaining.

Play infield in: Play in 8th inning or later if the Jets are behind by less than two or up one.

Outfield Throws: Always throw for go-ahead run 8th inning or later. Board Game -Throw for lead runner with less than 33/36 chances, otherwise throw to hold trailing runners. Computer game- always throw for slow lead runner, throw for average and fast lead runners unless "well around", otherwise throw to hold trailing runners.

Defensive replacements: Not much to choose from.

Minor League Assignments (subject to monthly instructions): In addition to the uncarded **Hudson, Anderson, and Hart:**

April: **Hoes, Thomas, W. Rodriguez, McCarthy, Wagner, Troncoso, Moore***

May: **Gindl, Rosales, W. Rodriguez, Slowey, Choate, Wagner, Corpas**

June: **Hoes, Guzman, Slowey, McCarthy, Choate, Troncoso, Gutierrez**

July: **Gindl, Guzman, W. Rodriguez, McCarthy, Wagner, Troncoso, Corpas**

August: **Hoes, Rosales, W. Rodriguez, Slowey, Choate, Gutierrez, Corpas**

September: **Gindl, Guzman, Slowey, McCarthy, Troncoso, Gutierrez, Wagner**

October: **Hoes, Rosales, W. Rodriguez, McCarthy, Wagner, Choate, Corpas**

November: All up

Enjoy the season!
