Pitching Instructions

Starters are for the most part to pitch until they are fatigued. This should hopefully be into the sixth. Do not remove if pitching a shutout. Remove if reduced.

Bullpen

Best way to run this group is to throw waves of pitchers at the problem.

Long Mop up depending on who is up Sampson, Banuelos, or Martinez. Enter the game at plus or minus four and remove for better pitchers if we rally to get closer. These guys pitch no more than 3 innings per series remove when fatigued

Middle Innings. Webb, Baez, Treinen are the main pitchers to use when the starter comes out. They pitch until fatigued and pitch approx 2-3 innings per series. They can move into the 7th if not fatigued. Get them out if score move to +/- 4 or +/-1.

The end of game pitchers. Colome Goeddel and Ross. Ross is a lefty specialist but due to IP can stay and pitch against righties. Colome and Goeddel are really 1 IP guys who can pitch 2IP per series. Estrada will make an appearance in May here as closer. You can also finish games with middle guys if you need to spread innings.
