# 2018 CALUSA INDIANS STANDARD INSTRUCTIONS 

SEASON OUTLOOK
Oh no, not us, We will survive
Oh, as long as we learn how to win, We know we'll stay alive
We've got to play all season
And We've got all season to do our best and We'll survive
We will survive, hey, hey Apologies to Gloria Gaynor
The theme for this season is "Survive". Especially the first five innings. If the game is close, the bull pen should provide an opportunity to win. Flexibility will be the team's strength. Guys can move around the diamond and play mutiple positions, allowing for late inning mixing and matching. The Goal? Win more than we lose, at least win 75+. Look forward to better days in 2019. When the "Calusa Nation Will Return, Will Return". The Indians will play the board at home.

## OFFENSIVE STRATEGY <br> HIT AND RUN:

Limited. Beginning in the 7th Inning, Indians (-1 or tied) eligible runner on first, eligible hitter at bat and less than two outs.

Baserunners: Davis; Harrison; Hernandez; Inciarte, or Owings. Batters: Inciarte; Flores; or Owings.
STEALING:
Limited. 7th inning or later, score -1 or tied, to get the winning or tying run to second. Davis, Inciarte, or Hernandez can attempt a straight steal when the H \& R is not in play, I.E. a non H\& R batter at the plate. Davis or Hernandez can come off the bench to attempt a straight steal. Limited to one straight steal, each, per series.

## PINCH HITTING:

Against a LHP: 8th inning or later, winning or tying run in scoring position, Cabrera for Martin or Owings. Against a RHP: Same situation as with a lefty, Owings for Cabrera.

## PINCH RUNNING:

Owings or Davis can come off the bench to pinch run for any base runner not rated"F". When that base runer is in scoring position and represents the winning or tying run. 8th inning or later.

## SACRIFICE:

7th inning or later to get winning or tying run in scoring position. And the $\mathrm{H} \& \mathrm{R}$ or straight steal is not an option. Batters: Martin, Wieters, Davis, \& Pence can attempt to sacrifice.

RUNNER ADVANCEMENT:

## RUNNER ADVANCEMENT:

## COMPUTER GAME:

"Well around the bag" ---- send the runner home, and a runner to 3rd if hit is to CF or RF.
If the fielder plays a hit "on the long bounce" ,Send the runner only if he's fast. Don't send him to 3rd. On doubles to RF line, send the fast runner home but hold the slow runner. An average speed runner can score if the OF arm is <30.
On well-hit drives to right-center, when bases empty, where the runner "hits 2 nd under a full head of steam" --- try for third if he hit any triples (in the real-life MLB season).
On singles to LF, an average or fast runner can score - but no one has a good shot at 3rd. On singles to CF and RF, fast runners have a good shot at 3rd, all runners should try to score. When the fielder "retreats to get it", send the runner home.

## DEFENSIVE STRATEGY

## OUTFIELD THROWS:

Throw for the lead runner unless the chances are 34+. Always throw for the tying/go-ahead runner starting in the 7th inning.
COMPUTER GAME: Follow the same principles for throwing at your runners as outlined for my runners.
HOLD RUNNER ON FIRST:
When $1 B$ (4or5) is playing first always hold. Otherwise:
a) Hold all fast runners.
b) Hold all average runners unless I have a lead of 2 or more and there is a PR hitter.
c) Hold slow runners only with a RH hitter or less than 2 out unless I lead by 2 or more.
d) Do not hold with 2 out and runners on 1st and 3rd unless runner on 1st is the lead or tying run.

PLAYING INFIELD IN:
PLAY 'IN' starting in the 8th inning, 0 or 1 out, tying or go-ahead run on 3rd.
INTENTIONAL WALK:
I only use this on those occasions when a monster hitter comes up with the game on the line. Your call. PITCH FROM THE STRETCH:
In the 7th or later, score tied or Indians up 1, with a threat on 3B.
DEFENSIVE REPLACEMENT:
9th inning, score Indians +1 to +3. Cabrera for Flores. Martin or Wieters (which ever is the back-up) for Barnes.
INJURY/Ejection SUBS:
1B Flores
INF Owings, Hernandez, Beckham or Cabrera
C Who ever is on the bench.
OF Who ever is on the bench.
DH Cabrera or best hitter off bench. Don't use Freeman off the bench.

COMPUTER NOTES:

1. Not necessary to send the game sheets/scripts for road computer games. 2. Do not use the computer manager function, prefer manual managing for the Indian road computer games.

## PITCHING STRATEGY

## MANAGING THE STARTERS

Nothing to see here, Move along please! The team is bereft of an ace, for that matter it is bereft of a number two or a number three. Hell, it's just plain bereft!! At best, it is a combo of fours and fives. It will be the mission of whom ever starts to complete a minimum of five innings. Only remove the starter before five innings, if pounded out. At the end of five innings, if the game is winnable, get the game to the bull pen. Winnable is defined as the game is tied, the Indians are winning, or the Indians trail by no more than four runs. If the game is not winnable, leave the starter in until pounded out or the game becomes winnable. If its one of those rare days when the dice or computer have been kind, and the starter has earned an up-grade, leave him in until fatigued. If pounded out use the pitcher in Group D to finish game.

## USING THE BULL PEN

Offers the best chance the team has to earned a victory. The combination of grades are not overwelhelming, but make the team competitive. If the game is winnable (see above) go to the pen as early as the sixth inning. Don't waste reliever innings on non-winnable games. Use Group D.

GROUP A: THE CLOSER!! The man, the myth, the legend, will maybe not a legend yet. But Raisel Iglesias is the man in a save situation. When the starter is not going for a complete game. Iglesias can enter the game after one out in the 8th and earn a 1.2 inning save.

GROUP B: The set-up group. J. Nicasio and D. Steckenrider. One will be active each month. Can pitch the 7th and 8th innings. Remove if fatigued. Limit two innings per game.

GROUP C: The Middlemen. G. Kontos, J. Smith, \& J. Minaya. Two will be active each month. Can pitch the 6th and 7th innngs. Remove if fatigued. Limit two innings per game.

GROUP D: Long Reliever and extra innings guys. J. Lyles, J. Jimenez, \& M. Diaz. One will be active each month. All are innocuous. They will pitch when the starter is pounded out and will finish the game. No inning limit. We will treat extra inning games as losses. So whom ever is active will pitch extra innings, unless by a miracle it becomes a save situation. Then use the best pitcher that hasn't been used.

THE LEFTIES: Daniel Coulombe, \& Brett Cecil. Don't fall into any particular group. Both will be active each month. Use them any inning, after the starter has been lifted, and tough hitters are due up with a minus vs. LHP. Both can face multiple hitters in one inning. Limit: One inning per game each.
