## Pitching Strategies

Starters: As usual, never remove a starter pitching a shutout and never let a starter pitch more than 11.7 innings. Here are the general guidelines:

Yamamoto, Minor and Lamet pitch a minimum of 5 innings unless bombed out of the game earlier. Then when fatigued and the score is within 4 runs either way, go to the bullpen.

Skaggs and DeSclafani pitch a minimum of 4 innings unless bombed out. Any time from the 5 th inning on, remove when fatigued or if a runner gets on base in scoring position if score is within 4 runs either way.

Lauer and Roark fill out the bottom of the rotation. These guys pitch a minimum four innings unless bombed out. In the 5th inning or later, go to the pen immediately if they give up a base runner with the score within 4 runs or if the fatigue unless pitching a shutout.

Relievers: All relievers are available in all relief situations as you see fit. Six and sometimes seven are available each month.

Available LHP are Urias 19* and Kolarek 13*, also sometimes Wieck 9*.

Available RHP are Robles 15* ; Greene 17* ; Gallen 16 ; Phelps 13* and sometimes Biagini 8*.
Keep in mind that Gallen as a Starter pitching Relief is designated with an $8^{*}$ fatigue and receives no +5 when entering the game. Try not to pitch a reliever more than 2.7 innings per outing.

Stretch: Have all pitchers pitch from the stretch with tying or winning run on 3 b in $8^{\text {th }}$ or $9^{\text {th }}$ inning.

## Defensive Strategies:

Defensive replacements: Taylor to OF for any OF2 if Dragons lead after batting in the $8^{\text {th }}$. No others please!
Holding runners on 1st: Never hold if score is $+4 /-4$. Always hold with two out or with PL at bat. If less than two out and SA or PR at bat, only hold if baserunner's SSN is greater than 18 and your runner has steal attempts remaining. Throw at all base stealing attempts.

Outfield Throws: Always throw for go-ahead run. Board Game -Throw for lead runner with less than $34 / 36$ chances, otherwise throw to hold trailing runners. Computer game- always throw for slow lead runner, throw for average and fast lead runners unless they are "well around", otherwise throw to hold trailing runners.

Play infield in when a runner reaches 3 b , less than 2 outs, in the 7 th inning or later if the Dragons are behind by two or less, tied, or up one ( +1 to -2 ).

Lineups: These are representative lineups. Monthly lineup changes will be provided by the 4th of the month

Offensive Strategies (in order of preference)
Steal: Myers, Edman and Taylor steal second in the $8^{\text {th }}$ and 9 th inning with less than 2 outs if they represent the tying or lead run.
Hit and Run: H\&R if $+1 /-3$ run differential with 0 or 1 out, with Edman, Gardner, Robles, VanMeter, Myers or Taylor running with any of these eligible hitters at bat: Biggio, Dozier, Edman, Gardner, McGuire, Robles, Russell, Tapia and Torres. Do not hit and run if your pitcher's control is worse than -26 on the board game or has a W on the computer.

Sacrifice: McCann or VanMeter ONLY when facing a LHP on the computer game, any inning, no outs, runners on first, or first and second.
Runner Advancement: Board Game- Use Adams Tables. Computer Game- try for the extra base when "well around" or ball deep in the gap.
Pinch hitting: Not much pinch hitting this year. Usually only Walker, Myers or Tapia could be available late in the game in a critical situation.
Pinch running: Taylor, Tapia or VanMeter can pinch run for Dozier, Reyes, Walker, Sanchez, McCann or McGuire in the 9th if they are the tying or winning run.

## 2020 Conclusion:

Please use these instructions as a guide. If something isn't covered or doesn't make sense, do what is best for the Dragon's. We will win more games than we lose this year. Maybe knock off some top teams along the way and sneak into the playoffs! Thanks' from the Detroit Dragons.
