MANAGING THE OFFENSE

Hit & Run

This should be an important part of a fairly weak offense but we lack steal attempts to make this work in all but a handful of times per series. Hill, Lindor, and Myers are the only runners on the front end of a H & R. Garcia and Judge may be added as the year progresses. Several batters are eligible with 2-31's but strikeouts make them a risky option. The better contact hitters of Naylor, Solano, Lindor, Torreyes, and Castro are the best choices. Use when possible until a steal attempt is used on each eligible runner.

Stealing

This has even more limits than the hit & run. This is bound to change during the year with players cycling between active/inactive rosters. For now with Lindor, Hill, and Myers in 8th or later score tied or we are down by 1, any number of outs, SSN of 27 or better.

Sacrifice

With the 8 or 9 hitter, 0 outs, runners on first, or first and second, score tied or we trail by 1.

Pinch-Hitting

Bench has no pinch hitting weapon this year, so we don't expect to pinch hit much. For Naylor's -10 v LHP, either catcher, or Torreyes if score is tight and we're in 7th or later.

Pinch-Running

For any slow or near slow runner (Naylor, McCann, Nido, Bell), late in close games. Adell or Maton are first choices.

Runner Advancement

Use whatever method you are most comfortable with. I refer to Adams tables as a guide for board play. On computer, I generally recommend trying for the extra base or home if "well around" comes up on the script and the runner is not slow.

DEFENSIVE STRATEGIES

Outfield Throws

Always throw for lead runner if chances are <32, trailing runner if chances are <20, unless lead runner is tie or go ahead, 7th or later.

Hold Runner on First

Hold all runners regardless of speed.

Play Infield In

Deep at all times except:

- 3rd or 2nd & 3rd, <2 outs, 8th or later, tie or winning run on 3rd
- Bases full, 0 outs, 8th or later, tie or winning run on 3rd

Defensive Replacement

If ahead by 3 or less, after we bat in the 7th.

- Any OF-3 (Hill, Marisnick, or Heyward) for any OF-2
- Lindor (if not starting & active) for any SS-8
- Nido for McCann

PITCHING STRATEGIES

Starters

The wheels didn't entirely come off of the one-hit wonder rotation of 2021, but it certainly appears a bit wobbly in comparison. This year's staff was reconstructed to a degree with multiple draft selections to ensure Matt Harvey's well earned release. There is still some quality at the top end, just not much of it. Only 41 starts of grade 17 between Bauer and Rodon, followed by 16 from grade 12 Shane Bieber. From there it descends to a plethora of mediocre grade 9's, 8's & 7's, then bottoms out with 12 starts of a grade 4. I offer no firm rules on how long a starter should pitch. Computer managers do have their restrictions on removing a fatigued starter. I generally let it up to the board road manager to decide if letting a starter pitch after grade reduction is reasonable given the score, inning, and bullpen usage.

Relievers

Four pitchers on this bullpen staff also have a fair number of starts. Espino, Caleb Smith, Stripling and Jose Suarez will be in and out of the rotation during the year. Based on that, I will indicate in monthly instructions how these 4 are to be used.

Devin Williams and Jose Suarez act as co-closers, one inning save types, that can pitch in tie games and extras as long as they don't go beyond 1 inning.

The group of Bummer, Richards, and both Smiths can be anywhere from middle inning (5-7) guys, or setup (7th-8th). All of them have problematic peripherals so that has to be considered with men on base or power hitters due up.

Bottom 2 of Bradley & Thompson are the ones to bring in if a starter gets knocked out early. When not in the rotation, Espino and Stripling should be used to avoid wasting innings on better relievers.
