Take extra base 22 plus chances on boards or rounding if fast or well around on computer.

Sac fly try to score from third with fast runner ball deep or outfielder on computer moving into the gap. 22 plus chances.

Pinch Run use Siri for S not a catcher Pinch Hit use O'Hearn if better than batter

Hold runners and pitch from the stretch as per default.

Throw for winning or tying runs at the plate in 6th or later. Keep the double play in order always. Play in 7th or later winning or tying run at third.

Intentional walk only when absolutely needed don’t let best hitter beat us in bottom of the 9th if weaker hitter follows.

Pitching

Starters should try to get into the 6th inning if possible. Most likely the 5th. We have a little over 4 RIP per game. On the boards one grade reduction for starters to get them into the 6th. Keep in if pitching a shutout, do not pitch past 10th inning. Remove when fatigued or reduced.

Relievers

1-5 Inning Strickland if losing by more than 5, Stephens, Pruitt, Luetge Hicks

6-8 Payamps Hearn, Acevedo, Milner, J Garcia

9 Morgan closer RH Hearn Closer LH

Move relievers in and out and use in any role this is a suggestion. We have 4 LHP that can be used to match up as needed. Use multiple relievers as they fatigue. Longer fatigue pitchers in first. Hearn can be sacrificed for an extra few innings. Use J Garcia in that case as a closer if needed
