## Pitching Strategies

Starters: Never remove a starter pitching a shutout and never let a starter pitch more than 11.7 innings. Here are the general guidelines:
Gallen, Valdez and Urias pitch minimum of 5 inning's unless bombed out of the game earlier. They pitch through their 1 st fatigue, then when fatigued for the $2^{\text {nd }}$ time and the score is within 4 runs either way, go to the bullpen.
If $+/-4$ runs, they should continue to maximize their innings. Try to get $7+$ from them.

Lauer, Martinez and Smeltzer pitch a minimum of 4 innings unless bombed out. Any time from the 5 th inning on, remove when fatigued or if a runner gets on base in scoring position if score is within 4 runs either way. If $+/-4$ runs, they should continue to maximize their innings. Try to get $6+$ from them.

DeSclafani and Kuhl pitch a minimum 3 innings unless bombed out. 4th inning on, go to the pen immediately if they give up a base runner with the score within 4 runs. If $+/-4$ runs, maximize their innings.

Relievers: All relievers are available in all relief situations as you see fit. Try not to pitch a reliever more than 2.7 innings per outing.

Available relievers are Bass 19*, Burke 17*, Matzek 17*, Wilson 16*, Quijada 15*, McHugh 14*, Woodford 12*, and Santana 7*.
Martinez 15* if not starting that month. (Santana or Woodford generally pitch the long relief innings needed if a starter gets bombed out!).
Try to bring a new reliever in to get the +5 grade increase in key situations. Bass or Burke should usually cover the $8^{\text {th }} \& 9^{\text {th }}$ if ahead or tied.
Stretch: Have all pitchers pitch from the stretch with tying or winning run on 3 b in $8^{\text {th }}$ or $9^{\text {th }}$ inning.

## Defensive Strategies:

## Defensive replacements: None please!

Holding runners: Most of the time I do not hold the runner at 1st. Two Exceptions: 1. Hold if a PL hitter is at bat. 2. If a SA or PR at bat, only hold if baserunner's SSN is greater than 29 and your runner has stolen base attempts remaining. Throw at all base stealing attempts.

Outfield Throws: Always throw for go-ahead run.
Board- Throw for lead runner with less than 34/36 chances, otherwise throw to hold trailing runners.
Computer- always throw for slow lead runner, throw for average and fast lead runner unless he's "well around", otherwise throw to hold trailing runners.
Play infield in when a runner reaches 3 b , less than 2 outs, in the 7 th inning or later if the Dragons are behind by two or less, tied, or up one ( +1 to -2 ).
Lineups : These are representative lineups. Monthly lineup changes will be provided by the 4th of the month

Offensive Strategies (in order of preference)
Steal: Edman $4^{\text {th }}$ inning on of game $+2 /-2,0$ or 1 out. Baez, McMahon and Edman steal second in the $8^{\text {th }}$ and 9 th inning with less than 2 outs if they represent the tying or lead run. Edman should also steal 3B if in the $9^{\text {th }}$.

Hit and Run: H\&R if $+1 /-3$ run differential with 0 or 1 out, with Edman, Baez, McMahon or Dozier running with any of these eligible hitters at bat: Edman, Bryant, Stephenson, Miranda or Yepez. Do not hit and run if your pitcher's control is worse than - 26 on the board game or has a W on the computer.

Sacrifice: No sacrifices are necessary.
Runner Advancement: Board Game- Use Adams Tables. Computer Game- try for the extra base when "well around" or ball deep in the gap.
Pinch hitting: In $8^{\text {th }}$ or $9^{\text {th }}$ inning if down by 1 or 2 runs or tied \& runner on base. Baez or Dozier vs LHP. Rios or Yepez vs RHP.
Pinch running: You should pinch run for Raleigh or Lowe in the $8^{\text {th }}$ or 9 th with Suwinski or Dozier if it is the tying or winning run.
