Estrada, Lindor: Twice per series, If adjusted SSN is 28 & above (2nd or 3rd) any inning score +/- 3 either way, hit & run not available. Steer: Same as above but only once per series

HIT & RUN

Use whenever legal with Naylor at bat & Lindor running, Matos at bat and anyone with steal attempts running.

SACRIFICE:

Matos from 5th inning on, 0 outs 1st or 1st & 2nd, tied or down by 1. Estrada same as Matos but from 8th inning on.

PINCH HITTING or RUNNING:

Very thin bench. Consider Encarnacion-Strand PH v RHP, Matos v LHP. Matos is only choice for pinch running for slower runners (speed <8)

RUNNER ADVANCEMENT:

On the boards send runner home on >27 adjusted. Or check with Adams tables. Computer as you would with your team.

DEFENSIVE STRATEGY

DEFENSIVE REPLACEMENTS:

If we lead by 1-4 runs 8th or later: Perez replaces Contreras, Anderson replaces any 3B-3.

HOLD/DON'T HOLD RUNNER:

Hold all runners regardless of speed.

INFIELD DEEP / IN:

Always play infield back except:

1) runner on 3rd or 2nd & 3rd, 0 or 1 out, 8th or later, score +1 to -1

2) 1st & 3rd, bases loaded, same as above but only with no one out

OUTFIELD THROWS:

Boards: Anything over 32, don't bother throwing. Keep batter or runners from advancing. Unless it's potentially final out of the game. Computer: As you would with your team

INTENTIONAL WALKS:

7th inning or later, to set up a DP unless on-deck hitter is a far better hitter or does not hit into double plays

<u>PITCH FROM THE STRETCH:</u>

Only if runner on 3rd is a legitimate threat to run, any # of outs, 7th or later, score 0 to +2, **Phillips** or **Williams** pitching

MANAGING THE PITCHING STAFF

STARTERS:

We will be using a 6-man rotation all year to spread things out a bit. For those starts made by the scary grade 5's, **Stripling** and **Wesnesk**i, plus the handful from **Bradford** and **Hoeing**, we will be using a caddy system. Those will be identified with each month's series instructions. With the better starters, **Ober**, **Lugo**, **Maeda**, **Bieber**, and **Williamson**, the goal has always been to pitch to fatigue point, and beyond if one team is ahead by 5 or more, providing rules allow. The usual strategies of not removing when pitching a shutout and not working beyond 10 innings also apply.

BULLPEN:

7 relievers are available per month. Check series instructions for who is active and target inning limitations.

Williams and **Phillips: 120** innings are closers. Either one can set up the other working mid- 7^{th} to stop a rally through the 8^{th} (prefer to not have them start the 7^{th}). Choice of who to use will depend on working around Williams shaky control. Both are good to pitch in extra innings, but limit to 2 innings max in those contests.

Moreta and Wesneski (when active as a reliever): 98 innings are 6th-7th inning guys as bridge to the closers.

Nelson, Smith, and Richards: 185 innings midgame, 5th-6th or if we are losing late to spare better arms

Bradford and **Hoeing:** 64 innings couple of swing pitchers that come in when starter gets knocked out before the 5th, or when we are behind 4 or more after the 6^{th} .

Pallante, King, & Bummer 232 innings: Innocuous grade 5's will act as caddies to low graded starters and bulk innings when needed.
